

YU-YUEH LIU

(438) 492-4434 • yuyueh.liu@gmail.com • <https://web.yueh.dev>

Technologies

Comfortable with

- JavaScript / TypeScript
- Python
- Bash
- Kubernetes
- Docker
- REST / GraphQL
- Git version control

Experience with

- C / C#
- Java
- SQL (PostgreSQL) / NoSQL (MongoDB)
- HTML5 & CSS3/SASS
- Full Stack Development: AngularJS-Flask, React-NodeJS

- Native Android Development
- CI / CD: GitHub Actions, GitLab, Jenkins
- IaC: Terraform, Ansible
- Cloud Platform: GCP, AWS, OpenStack

Work Experience

Backend Developer

Mercantile Financial Technologies Inc., Montreal, CA, Jul 2021 – Present

- Designed and built the identity decisioning module during MVP
- Work with credit, finance and compliance departments to integrate third-party services (check issuing, credit reporting, accounting)
- Full-stack development on the internal admin dashboard
- Worked with NestJS (TypeScript), TypeORM, PostgreSQL, React, RTK-Query, Material-UI, GraphQL

Full Stack Developer

Ormucio Inc., Montreal, CA, Jan 2020 – Jul 2021

- Design and maintain backend microservices, and integrate them with the frontend client
- Manage production-ready Kubernetes clusters and manage continuous integrations/deployments
- Worked with NodeJS (TypeScript), Sequelize, ReactJS, Kubernetes, Ambassador Edge Stack

Full Stack Developer Intern

Ormucio Inc., Montreal, CA, Feb 2019 – Dec 2019

- Maintain and improve Ormucio's IaaS platform UI and fix bugs on frontend and backend bugs
- Add new features such as Shared File System as a Service, Workflow as a Service and ReCaptcha
- Worked with AngularJS (JavaScript), Flask (Python), Jinja2, CockroachDB

System Administrator DevOps Intern

BroadSign International Inc., Montreal, CA, Sep 2018 – Apr 2019

- Investigate different logs aggregation/processing tools and deploy AWS resources with Terraform
- Create PoC for centralized logging solution with AWS CloudWatch, customize log agent configuration files for all environments and projects using Chef
- Worked with AWS, Embedded Ruby, Terraform, Chef

Personal Projects

Patient Dashboard

- A dashboard that helps healthcare providers list, view, edit, add, and delete patient profiles, streamlining patient management and enhancing care delivery.
- Built with: Firebase Auth, React, RTK-Query, Material-UI, Express and MongoDB

WebsiteWatcher

- Python CLI that watches a website and notifies the user via Email or SMS when the watcher condition is met.
- Built with: Python, Selenium WebDriver, BeautifulSoup 4, Twilio Email/SMS API

Education

Bachelor of Software Engineering

McGill University, Montreal, CA, Sep 2015 – Dec 2019

- *CGPA: 3.64/4.00*

Extracurricular Activities

Member of UBC Kungfu Club

- Teach Hok San lion dance style and create routines for performances
- Perform lion dance shows at wedding ceremonies and at restaurants for Chinese events
